Fiberfrax® Moist Pak™

DESCRIPTION
Fiberfrax Moist Pak is made from high strength Fiberfrax ceramic fibre blanket impregnated with inorganic bonding agents resulting in flexible insulation that dries to a hard rigid structure. Moist Pak products are ideal for insulation of complex shapes and for service under conditions of high hot gas velocities. The materials are packaged in polythene bags to retain the wet binder during shipment and storage. Moist Pak products are available in a range of density and thickness combinations.

GENERAL CHARACTERISTICS
Fiberfrax Moist Pak products have the following outstanding characteristics:

- High temperature stability
- Low thermal conductivity
- Low heat storage
- Good corrosion resistance
- Complex shape capability

TYPICAL APPLICATIONS

- Hot face layer of furnace and kiln linings
- Hot gas duct, flue & stack linings
- Thermal and corrosion protection of tube supports in process heaters
- Non-ferrous metal launder linings

Any new and/or special use of these products, whether or not in an application listed in our literature, must be submitted to our technical department for their prior written approval.

**Physical Properties**

- **Colour**: White
- **Dry Product Density (kg/m³)**: 300 - 400
- **Binder Type**: Alumina/Silica
- **Use Limit (°C) ***: 1100

**Thermal Conductivity (W/mK)**

- **Mean Temp.**
  - 400 °C: 0.10
  - 600 °C: 0.13
  - 800 °C: 0.18

**Permanent Linear Shrinkage (%) 24 Hour Soak**

- 1100 °C: <4.0

*The maximum continuous limit temperature for these products depends upon application conditions. For certain applications operational temperature limits may be significantly reduced. For assistance or clarification please contact your nearest Unifrax Engineering office. Where appropriate Physical Properties data measured according to EN 1094-1.

HANDLING INFORMATION

A Material Safety Data Sheet has been issued describing the health, safety and environmental properties of this product, identifying the potential hazards and giving advice on handling precautions and emergency procedures. This must be consulted and fully understood before handling, storage or use.

Other thicknesses / sizes may be available on request subject to minimum order requirements.

Information contained in this publication is for illustrative purposes only and is not intended to create any contractual obligation. Further information and advice on specific details of the products described should be obtained in writing from a Unifrax Corporation company (Unifrax España, Unifrax France, Unifrax GmbH, Unifrax Italia, Unifrax Limited, Unifrax s.r.o.). Unifrax maintains a continuous programme of product development and reserves the right to change product specifications without prior notice. Therefore, it maintains at all times the responsibility of the customer to ensure that Unifrax materials are suitable for the particular purpose intended. Similarly, insofar as materials not manufactured nor supplied by Unifrax are used in conjunction with or instead of Unifrax materials, the customer should ensure that all technical data and other information relating to such materials has been obtained from the manufacturer or supplier. Unifrax accepts no liability arising from the use of such materials. All sales made by a Unifrax Corporation company are subject to that company’s Terms and Conditions of Sale, copies of which are available on request.
