DESCRIPTION

Fiberfrax SP Mat is a premium grade insulating mat manufactured from Fiberfrax refractory ceramic fibres. SP Mat offers a more consistent density and a lower shot content than traditional ceramic fibre blankets. Fiberfrax SP Mat is completely inorganic and so retains its strength, flexibility and thermal properties in many working environments, without the generation of smoke or fumes. SP Mat is available in a range of density and thickness combinations.

GENERAL CHARACTERISTICS

Fiberfrax SP Mat has the following outstanding characteristics:

- High temperature stability
- Low thermal conductivity and heat storage
- High tensile strength and resiliency
- Resistance to thermal shock and chemical attack
- Consistent density and uniform profile

TYPICAL APPLICATIONS

- Controlled cooling of cast parts
- Nuclear insulation
- Aerospace insulation
- Automotive heat shielding
- Industrial catalytic heating

Any new and/or special use of these products, whether or not in an application listed in our literature, must be submitted to our technical department for their prior written approval.

### Physical Properties

- **Colour**: White
- **Classification Temperature (°C)**: 1250
- **Melting Point (°C)**: 1800
- **Mean Fibre Diameter (microns)**: 2.0
- **Specific Heat at 1000°C (J/kgK)**: 1040

### Permanent Linear Shrinkage (% 24 hour soak)

- **1250 °C**: 2.5

### Thermal Conductivity (W/mK)

- **Mean Temp.**
  - **400 °C**: 0.10
  - **600 °C**: 0.16
  - **800 °C**: 0.24

### Tensile Strength (kPa)

- **Mean Temp.**
  - **400 °C**: 25
  - **600 °C**: 50
  - **800 °C**: 65

*Classification Temperature is not a definition of the operational limit of these products, especially when long term physical or dimensional stability is a factor. For certain applications continuous use temperature limits may be significantly reduced. For assistance or clarification please contact your nearest Unifrax Engineering office. Where appropriate Physical Properties data measured according to EN 1094-1.

### Handling Information

A Material Safety Data Sheet has been issued describing the health, safety and environmental properties of this product, identifying the potential hazards and giving advice on handling precautions and emergency procedures. This must be consulted and fully understood before handling, storage or use.

---

Information contained in this publication is for illustrative purposes only and is not intended to create any contractual obligation. Further information and advice on specific details of the products described should be obtained in writing from a Unifrax Corporation company (Unifrax España, Unifrax France, Unifrax GmbH, Unifrax Italia, Unifrax Limited, Unifrax s.r.o.). Unifrax maintains a continuous programme of product development and reserves the right to change product specifications without prior notice. Therefore, it maintains at all times the responsibility of the customer to ensure that Unifrax materials are suitable for the particular purpose intended. Similarly, if other materials not manufactured nor supplied by Unifrax are used in conjunction with or instead of Unifrax materials, the customer should ensure that all technical data and other information relating to such materials has been obtained from the manufacturer or supplier. Unifrax accepts no liability arising from the use of such materials. All sales made by a Unifrax Corporation company are subject to that company’s Terms and Conditions of Sale, copies of which are available on request.
