

# Certificate Of Fire Approval

This is to certify that the product detailed below will be accepted for compliance with the applicable Lloyd's Register Rules and Regulations and with the International Convention for the Safety of Life at Sea, (SOLAS), 1974, as amended, for use on ships and offshore installations classed with Lloyd's Register, and for use on ships and offshore installations when authorised by contracting governments to issue the relevant certificates, licences, permits etc.

<b>Manufacturer</b>	<b>Unifrax Limited</b>
<b>Address</b>	Mill Lane, Rainford, St. Helens, Merseyside, WA11 8LP, United Kingdom (UK)
<b>Type</b>	Non-Load Bearing Fire-Resisting Bulkhead 30 (Restricted Application)
<b>Description</b>	Fire Resisting Non-Load Bearing Aluminium Bulkhead Insulated on the Stiffened Face (Fire Exposed Side) with Type: "Non-Load Bearing Fire-Resisting Bulkhead 30" system for High-Speed Craft, using "FyreWrap LT" AES wool insulation
<b>Trade Name</b>	Non-Load Bearing Fire-Resisting Bulkhead 30 - FyreWrap LT (Marine) Blanket
<b>Specified Standard</b>	IMO Res. MSC.45(65) Res.MSC.61(67) – (FTP Code), Part 11 IMO Res.MSC.101(73)– 2000, Amendments MSC/Circ.1120 IMO Res. MSC.307(88) – (2010 FTP Code), Section 8

This certificate is not valid for equipment, the design or manufacture of which has been varied or modified from the specimen tested. The manufacturer should notify Lloyd's Register EMEA of any modification or changes to the equipment in order to obtain a valid Certificate.

The Design Appraisal Document and its supplementary Type Approval Terms and Conditions form part of this Certificate.

This certificate remains valid unless cancelled or revoked, provided the conditions in the attached Design Appraisal Document are complied with and the equipment remains satisfactory in service.

### **ATTACHMENT TO CERTIFICATE OF TYPE APPROVAL No. SAS F180178-02**

The undernoted documents have been appraised for compliance with the relevant requirements of International Conventions, and this Design Appraisal Document forms part of the Certificate.

This Certificate is an amendment of previous Lloyd's Register EMEA Certificate of Fire Approval No: SAS F180178

#### **APPROVAL DOCUMENTATION**

1. Exova Warringtonfire, Warrington, United Kingdom; Fire Test Report No. WF 325438, dated 09 May 2013.

#### **CONDITIONS OF CERTIFICATION**

1. **Restricted Application:** When applied to an aluminium Non-Load Bearing Fire Resisting Bulkhead for High Speed Craft Code applications and moderate fire hazards, the bulkhead may be classified as a "Non-Load Bearing Fire-Resisting Bulkhead 30" restricted to applications with insulation and stiffeners on the fire exposed side of the bulkhead
2. When applied to the fire exposed insulated and stiffened side of a non-load bearing aluminium bulkhead with the "FyreWrap LT (Marine) Blanket" AES wool insulation system (both described below), this design of insulated bulkhead may be considered as a 30 minute Non-Load Bearing Fire-Resisting Bulkhead suitable for fire risks on the insulated and stiffened side of the bulkhead only
3. Aluminium structure consists of: 32mm x 32mm x 3mm channel bar stiffeners intermittently welded to one side of a 2mm thick flat plate by one flange, with stiffeners at 125mm spacing and T-Section members 150mm long x 100mm wide x 6mm web x 10mm flange, at 1200mm spacing and at 90° to the channel bars
4. Insulation consists of: one layer of "FyreWrap LT (Marine) Blanket" AES wool insulation (35mm thick, 70kg/m<sup>3</sup> density), applied to the fire exposed insulated and stiffened side (fire exposed side) of a non-load bearing aluminium bulkhead, over the tops of channel bar stiffeners and retained by steel pins (secured in welded aluminium ferrules) and steel spring washers, attached to alternate channel flanges at 250mm spacing (creating a 32mm air gap between the plate and the layer of insulation) and spaced at 215mm between T-Sections and 250mm across stiffeners and at 50mm from all insulation joints and boundaries. A strip layer (350mm width across T-Sections) of same insulation was applied over T-Sections and overlapped the insulation layer over the channels and was retained with the same 3mm diameter steel pins and steel spring washers. An infill of the same insulation was also applied in air gaps between channel sections, in way of all insulation butt joints
5. The core temperature of aluminium alloy shall not rise above a maximum 200°C limit above ambient temperature for 30 minute duration of test
6. "FyreWrap LT (Marine) Blanket" AES wool insulation may be considered with alternative facing materials that have been tested for Low Flame Spread Characteristics
7. Application in each case to be approved by Lloyd's Register at the design stage
8. Composition and application of sub components to be maintained in production and use in accordance with originally tested composition formula and method of application, and manufacturer's instructions

**ATTACHMENT TO CERTIFICATE OF TYPE APPROVAL No. SAS F180178-02**

9. Production items are to be manufactured in accordance with a quality control system which shall be maintained to ensure that items are of the same standard as the approved prototype
10. The Certificate holder is solely responsible for the products supplied under this Certificate and to ensure that their products, whether manufactured by themselves or their licensee manufacturers, if agreed by Lloyd's Register, are fully compliant with the relevant statutory regulations and Lloyd's Register Class Rules as applicable and designed, manufactured and installed to the same quality and specifications as the prototype tested, including components that are designed and manufactured by third parties

**Supplementary Type Approval Terms and Conditions**

*This certificate and Design Appraisal Document relates to type approval, it certifies that the prototype(s) of the product(s) referred to herein has/have been found to meet the applicable design criteria for the use specified herein, it does not mean or imply approval for any other use, nor approval of any products designed or manufactured otherwise than in strict conformity with the said prototype(s).*
